Juniper

Juniper
Airline Vacations

Juniper Travel Technology, leader in providing **technological solutions** for the **tourism industry**, with more than **450 Clients**, has added the **Juniper Airline Vacations** division to its corporate structure. This division helps airlines offer additional services to meet the needs of travelers.

Our **tourism product distribution system** allows airlines to offer flight tickets and fully customizable vacation packages. We have everything you need to enhance your client experience and loyalty program. With our platform you will be able to connect worldwide to the main travel Key Players through our more than **500 XML connections.**

Our team of more than **300 travel industry experts**, from developers specialized in air distribution to business managers who understand the importance of ancillary revenue, is highly qualified and ready to help you make the leap into leisure travel by creating **all-in-one integrated experiences**.

Discover how to **streamline your revenue** and **margins** as you build your integrated omnichannel travel experience for your clients.

Juniper
Dynamic Packages

Create vacation packages, combining your products with external suppliers. Taylor each package to your needs with a dynamically calculated price.

With **Juniper Dynamic Packages** , you will be able to offer your clients a website to sell your tourism product under their own brand name, moreover:

Offer **additional services,** which may be optional or mandatory.

Sell your packages online using **a secure payment gateway.**

Configure **commissions** and **payment** methods from your intermediaries.

Present a detailed **package price breakdown** to your clients.

Obtain **reports** and **statistics** that will enhance data insights on clients and products that are part of the package.

Juniper
Loyalty Program

Design unique offers and campaigns for your most loyal clients.

Juniper Loyalty Program includes dynamic travel products to help drive engagement, generate repeat visitation, and encourage higher spending.

Increase revenue and **conversions**. Build clients loyalty by enabling points offers with incentives to earn loyalty points and redeem them in combination with financial methods and benefits.

Choose and combine **various travel options** from our travel supplier partners anywhere in the world, including flights, hotels, car rentals, activities, and experiences.

Identify and serve **traveler needs** as quickly as possible. Organize and coordinate the distribution of travel products rapidly.

Create special rules when using your branded credit card. With Juniper, you decide on the perfect combination for your program.

Deliver **personalized shopping experiences** by encouraging clients to book travel products while creating exclusive offers for each tier in your loyalty program.

Juniper
Promotional Codes

Create offers for any type of product, be they directly contracted or externally supplied products.

With **Juniper Promotional Codes** module offer discounts and promotions to your clients and boost your revenue. Each type of promotional code can be applied to all products at the same time or to the preferred products, configuring the rules for each.

Maximize your revenue per passenger with 3 types of discounts:

Increase the revenue by specifying the rules of booking and travel dates, days in advance, amount, sales channel, product type and supplier with **early booking discount.**

Generate a unique code for single use that can be applicable as a gift applying **promotions.**

Create a free text alphanumeric code with limited use creating **campaigns.**

Juniper
Multicurrency

Operate with different currencies and languages in the same interface and **increase your sales opportunities**, facilitating payment options to your clients according to their currency.

The **Juniper Multicurrency** module allows you to book with suppliers in their local currency, applying your own currency exchange.

Increase competitiveness by contracting directly in local currency and applying your own currency exchange gives you far more control and makes your offer much more competitive.

Escalate sales opportunities and facilite payment options to your clients according to their currency.

Make payments to vendors worldwide **efficiently** and **securely** using Virtual Credit Card (VCC).
